The indicator was placed on a student on 08/21/03, manually. The engine prevents enrollment. If the 08/17/02 row is removed from the indicator (with the CENR); enrollment occurs without error. If the row is Inactivated - it still stops enrollment. The engine does not seem to be looking at the effective date of the indicator or the effective date of the service indicator.

Campus Community	1503864000	Addresses	AV_RELATE_PE - RowInit peoplecode on ADDRESS_SBR.POSTAL.RowInit	This is an issue introduced in the bundle by the usage of the ADDRESS_SBP and the ADDRESS_OTHER_SBP on the CR Person Org and Org Person relationships pages. There is RowInit peoplecode on ADDRESS_SBR.POSTAL.RowInit that is calling a function to format the Postal value. If that function finds an invalid value according to the coded rules for the Country, it throws a warning message. No warning messages should be thrown during row init, because processing stops. In this case processing stops and the rest of the page is not formatted correctly.
