

PeopleSoft Enterprise - SA8SP1 Bundle 24 Release Notes

Campus Solutions Student Administration

These release notes reflect application updates for PeopleSoft Enterprise Campus Solutions Student Administration products in SA 8SP1 Bundle 24.

Product	Category	Incident ID	Reported Problem Description	Problem Description
Contributor Relations	Manage Memberships	1629551001	How do we leave manual memberships updated by the user intact?	<p>The system seems to identify the Memberships added manually only ("Added by" and "Last update"). But doesn't identify when the record has been modified by the user. So my guess is that AVGCLUB doesn't have a way to know if the record has been modified manually or not. So, because of this, AVGCLUB fixes the data on this record like it does for all the rest.</p> <p>In order to make it look "manual", we need to delete the current record and create a new one, entirely manual. As you can see on the last example in the Word document, it's not possible to add data without specifying the Fiscal Year (even for a GC that doesn't reset at FY !). If this would be fixed, I believe AVGCLUB would leave all the manuals untouched (because if the record, it would appear "Added by the User").</p>
	Manage Orgs	1722118001	Inactive organization name not showing in relationships section on organization profile	Customer can not see the name for an inactive organization in the Relationships section for the Organization Profile for an org to org relationship.
	Manage People	1707354001	Organization Name Change Problems	We noted a difference between the organization name in Organization page and the page Person to Org Relationships for the same organization. We see the old name of the organization in the page Person to Org Relationships after a modification in the page Organization.

Product	Category	Incident ID	Reported Problem Description	Problem Description
	Manage People	1718101001	There is a problem with an inactive organization's description	The description of an organization disappears when it is inactive in Person to Org Relationships
Financial Aid	Auth/Disburse	1757840001	FA Disbursements: Verify valid CIP Code for enrolled courses for SMART grant	For SMART grant. Provide a disbursement authorization option that checks the student's enrolled courses for a term and verifies at least one course is for the student's qualifying major. This should be performed by comparing the CIP Code used to establish eligibility for the grant with the CIP Code assigned in the course catalog or in the subject table.
	COD DL	1758417001	Invalid Value Message on FALDIDO COBOL DL Inbound Driver	Customer receives the following message when running the Direct Loan In process: FAPLDIX8 : Invalid Change Field Value S210 for 'emplid of student' DUN1. FAPLDIX8 uses the copybook FACLDXF2 which does not have a S210 entry for the PreProfessional Coursework field.
	FA Term	1709436003	Hera Load Level Rule Set up Component Search Record Problem	The Search Record on SFA_ASG_AL_TBL component is INSTITUTION_TBL so all rows are displayed to select to attach the HERA rule. This search record needs to be changed to include max effdt dated logic so the HERA rule isn't inadvertently attached to the to the wrong row.
	FA Term	1758475001	FA Term HERA Level calculation redesign for 2009	The HERA academic level calculations performed by FA Term needs to be redesigned based on the final regulatory changes for the ACG and SMART grant programs. The existing method for calculating HERA level must be preserved for aid year 2008 and prior years.
	FISAP	1686587001	2008 - 2009 Aid Year updates for FISAP Reporting	FISAP fiscal operations report for 2007-2008 and application to participate for 2009 - 2010.
Student Records	Class Search	1753189001	Class Search peoplecode issues using function RemoveAccent	Class Search peoplecode uses the HR function RemoveAccent. This is causing a conflict when customers are upgrading to CS9 because they must apply all CS bundles before applying HR bundles.

	Grading	1740714001	Grade Roster in Posted Status but grades still pending	The Grade Roster status is Posted even with unposted grades. If the grade post process encounters an error, all the grades beyond the error are marked as Pending. The grade roster is being placed in a Posted status irrespective of the status of the process. The roster should not be set to posted status when there are pending grades or one of the grades is presented with an error. There is no way except through SQL to change the status of the roster once it is posted.
